Website Launch Checklist

A practical pre-launch checklist for small business websites and personal portfolios.

01 / Content and Pages

[ ] Check Home, About, Services or Projects, and Contact pages.

[ ] Proofread headings, copy, buttons, contact details, and spelling.

[ ] Test every navigation link and call-to-action.

[ ] Add a unique page title and meta description to important pages.

02 / Design and Mobile

[ ] Test desktop, tablet, and mobile layouts.

[ ] Check contrast, font sizes, spacing, and button tap targets.

[ ] Add relevant image alt text and compress oversized images.

[ ] Confirm there are no overlapping sections or horizontal scrollbars.

03 / Technical Checks

[ ] Confirm HTTPS works without mixed-content warnings.

[ ] Check the browser console and test all important forms.

[ ] Verify 404 pages and redirects.

[ ] Check robots directives, canonical URLs, and sitemap where applicable.

04 / Performance and SEO

[ ] Run Lighthouse and review high-impact recommendations.

[ ] Use descriptive URLs and helpful internal links.

[ ] Connect Google Search Console if appropriate.

[ ] Check that important pages can be crawled and indexed.

05 / Before Publishing

[ ] Confirm a backup or version-control history exists.

[ ] Verify where contact form submissions are delivered.

[ ] Review privacy and disclosure notices where applicable.

[ ] Test the live site in a private browser window.

General planning aid: requirements vary by website, platform, and jurisdiction.
